TPO Eco Walkway Pad...

Earlier this year, Firestone introduced a new TPO walkway pad called the "Eco Walkway Pad". The Eco Walkway Pad is composed of recycled TPO and EPDM, making it an environmentally friendly choice for a walkway system for your Firestone TPO roofs. Because the Eco Walkway Pad is produced from 100% recycled material, it can contribute to the United States Green Building Council's L.E.E.D. program for materials and resources Credit #4 for Recycled Content.

The original Walkway Pad was reinforced with a glass fiber scrim. Due to difficulty in field cutting the pad, the reinforcement has now been eliminated but the thickness of the pad increased approximately 10% for added durability.

Each roll of the Eco Pad is 30" wide by 40' in length, making it ideal for continuous walkway systems or cutting into pads for use around units, doorways, and hatches. The installation of the Eco Walkway Pad is completed by heat welding the entire perimeter of the pad to Firestone's TPO 96 or 120 membranes. Technical Information and Material Safety Data Sheets have been posted to Firestone's website for your use. The list price of the Eco Walkway Pad (part number W56TPO3019) remains at \$248 per roll.

Water-Based Bonding Adhesive...

Firestone's Water-Based Bonding Adhesive for EPDM and TPO membranes is becoming the preference of contractors across the country, with double-digit growth over the past year. Effective immediately, due to a packaging change, there will be a name change. The new name will be WATER-BASED BONDING ADHESIVE (s), and it will also have a new part number, W563587035. The price remains the same as does the other attributes of Firestone's Water-Based Bonding Adhesive. Firestone's current Water-Based Bonding Adhesive will be phased out around September 15, and replaced with Water-based Bonding Adhesive (s) as orders are placed.

Should you have any questions, please contact your Firestone Sales Representative or Technical Coordinator for assistance.

Best Regards,

Jim Jannasch
Manager, Product Deployment
